IDS® ELITE
Composite Access Covers
Made in Ireland, fully certified to EN 124-5:2015

NEW

EJ are leading the way with the first, independently certified composite access covers to the revised EN 124-5:2015 standard.

The skid resistant composite covers with steel frames are fully designed and tested to EN 124-5:2015 B125 and are compatible with the DATUM™ range of chambers. The covers are badged TRAFFIC SIGNALS and STREET LIGHTING as standard.

The IDS ELITE range of composite access covers offer exceptional solutions for the most challenging environments. They are corrosion resistant with good ergonomic handling and being non-metallic are a theft deterrent, assuring peace of mind to utility owners and local authorities.
Key Features of the IDS ELITE Range

- Light-weight, easy to handle and install, up to 70% lighter than the iron equivalent
- Corrosion resistant even in the most aggressive environments
- No resale value to the scrap market
- No signal interference with wireless communication devices
- Non-conductive of stray voltage or heat
- Coarse skid resistant upper surface featuring the trademarked 4L non slip pattern
- UV resistant protective surface layer
