

# STRETO - D400

High strength, composite cover for trafficked areas

## Features

- Cover and frame is EN 124:2015 compliant
- Clear opening 600 mm diameter
- Composite cover and robust ductile iron frame for high rigidity and installation performance
- First D400 product on the market to exceed the fatigue requirements of EN 124:2015 D400
- Continuous EPDM cushioning insert fixed to the frame
- Ensure non-rock stability and eliminates noise pollution
- Stainless steel 1/4 turn camlock with OTC type head as standard (other security lockings available on request)
- Cover can be unlocked and lifted from its frame using a handling key
- Customised badging available
- Cover available in any RAL colour

Continuous EPDM cushioning insert attached to the frame to ensure non-rock stability

Third party certification to EN 124-5:2015 by the NSAI

Cover can be unlocked and lifted from its frame using a bespoke handling key (514827)

## Bespoke locking bolts available to provide increased security on critical networks
